

Continuation of Statement / Interview

G.A. STOOKE - VAUGHAN

has been aggravated by this incident. I also suffer from a medical condition Ocular Myasthenia Gravis, which is an auto immune illness affecting certain muscles in your body, which leave me extremely tired and short of energy. This whole incident has totally exhausted me. It has really shook me up and shocked me. I have seen Dr. Morris, Llanidloes Surgery this morning whereupon I have been treated for a badly swollen nose, severely bruised blackened left eye. I was advised to take strong painkillers for the injuries. I am also suffering from sore ribs to my left side, sore teeth gum area and have had a continual headache from the time of the incident up until now. I wish to make this my official statement of complaint and I will assist the Police in their enquiries. The Victim Personal Statement scheme has been explained to me and I have received the relevant leaflet. I do not wish to partake in this scheme at this time.
